Above average yielding varieties that were tested for 2 or more years. The yields for these varieties are greater than or equal to 1 standard deviation from the average. Varieties are sorted by yield from high to low. Top Yield Group % is the percentage of time the variety was in the top yield group across all locations tested in this category. Any values above 3% are highlighted in green. For more details on these varieties, visit ncovt.medius.re

#NOTE: Values for "Tidewater" are based on one location for 2023 where March freeze negatively impacted yields for early varieties. Use that data with caution.

Locations represented: STATEWIDE = 6, Coastal Plain = 2, Piedmont = 3, and Tidewater = 1
